Skills

Languages: JavaScript, TypeScript, Python, Java, SQL
Technologies: React, Next.js, Express.js, Prisma ORM, React Query, Node.js, MongoDB, Stripe
Tools: Git/GitHub, Bitbucket, Agile/Scrum, Jira, Kanban

Experience

Software Developer, Unifox – Bordeaux, France   May 2025 – Present

- Designed the entire frontend of a **crypto** trading platform, optimizing state management and API calls, reducing load times by 50% and increasing **DAU** conversion by 30%.
- Built a responsive interface faithful to **Figma** designs using **Next.js** and **Tailwind CSS**.
- Developed critical **API endpoints** and a **caching** system, improving data retrieval by 2 seconds.

Software Developer, Enopps – Agadir, Morocco   May 2024 – May 2025

- Developed a **Next.js/React SaaS** form builder, enabling non-technical teams to deploy forms 65% faster.
- Implemented **embeddable** forms that automatically adapt to the client website's theme.
- Added drag-and-drop, dynamic **Zod** validation, and an **optimistic** UI.
- Built backend **Express** authentication and barcode scanning features.

Projects

FarmTech – Multi-Tenant Agricultural Management SaaS System   May 2025 – June 2025

- Developed a complete agricultural management system: **birth tracking**, herd management, health, feeding, finance, inventory, employees, and automated alerts.
- Designed a **multi-tenant** architecture ensuring strict data isolation per client.
- Managed **DevOps**, authentication, authorization, CI/CD pipelines, and external integrations.
- Implemented full **internationalization** (Arabic, French, English).
- Transformed a time-consuming manual process into an automated system, reducing management time by over 70%.

Joinspots   March 2025 – May 2025

- Designed a secure **PDF-based ticket delivery** system, reducing support tickets by 47%.
- Developed a complete **organizer dashboard** to manage inventory, sales, and scheduling.
- Built the organizer payment system using **Stripe**, handling commissions and automated **payouts**.

Ubeego Cars   February 2025 – March 2025

- Architected the frontend in **Next.js** with a multi-level **caching** strategy (ISR/SSG).
- Optimized vehicle selection and filtering using **React Query** and partial hydration, increasing booking conversion by 26%.
- Developed the core booking logic using **Next.js Server Actions**, strengthening data mutation security.

Sous Drougrie   February 2024 – March 2024

- Secured the **payment gateway** using atomic transactions and Stripe.
- Developed **cart management** (promotions, taxes), increasing checkout completion by 30%.
- Optimized core **e-commerce** principles, improving server response times by 15% and supporting 50% more concurrent users.
